

The COMET architecture

An approach based on metadata
to integrate forestry decision
support components

Overview

- ◆ Introduction
- ◆ Metadata concept
- ◆ Metadata details
- ◆ Conclusion

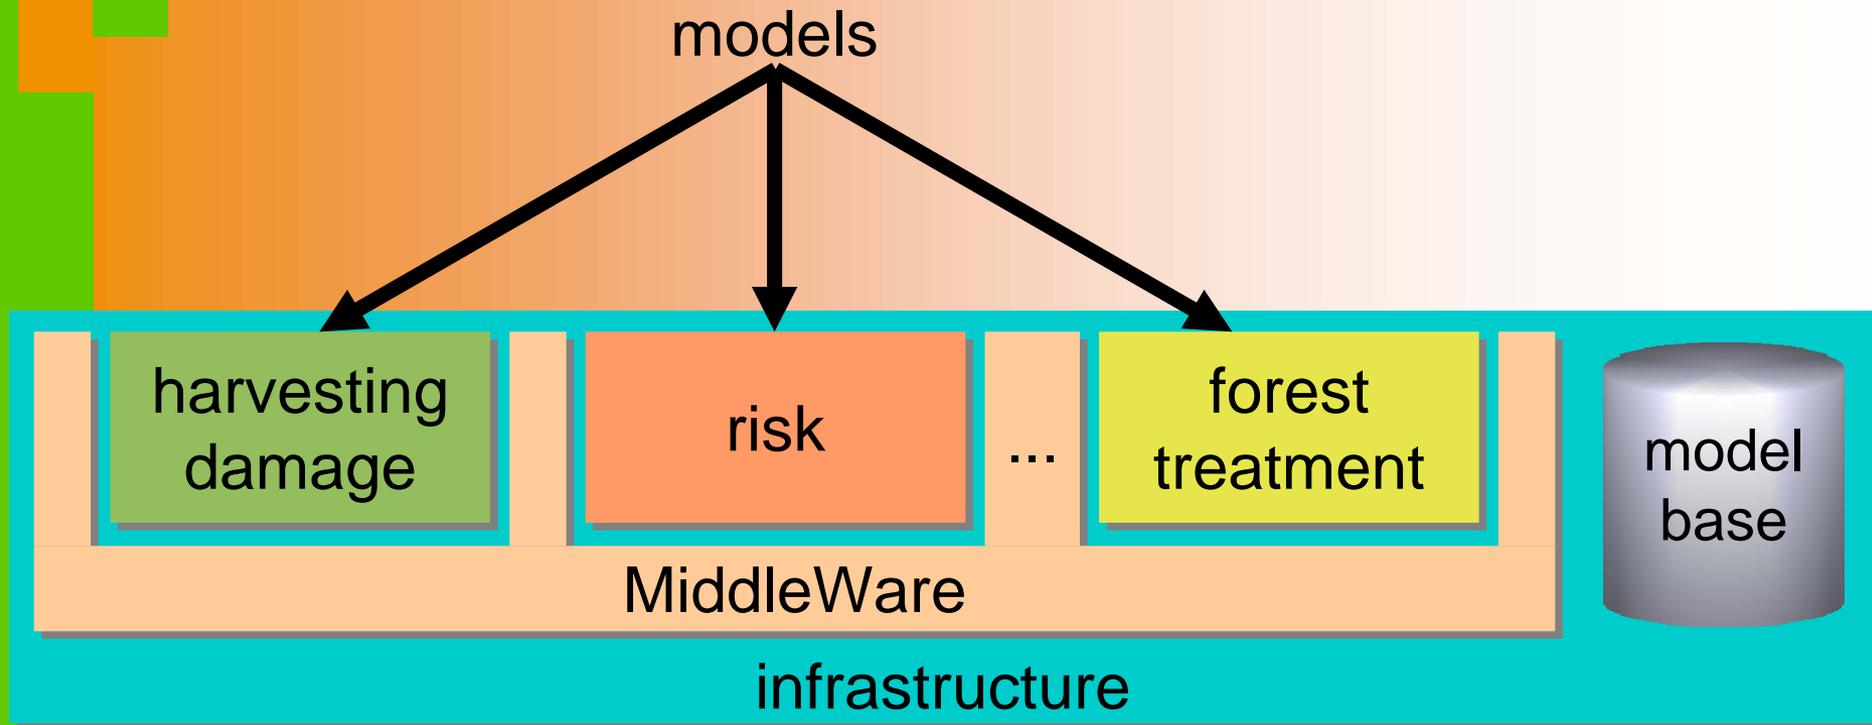

◆ Introduction

- ◆ Metadata concept
- ◆ Metadata details
- ◆ Conclusion

Problems

- ◆ Requirements
 - Technical
 - IT specific
- ◆ Consequences
 - Functionality
 - Interfaces
 - Performance

Idea

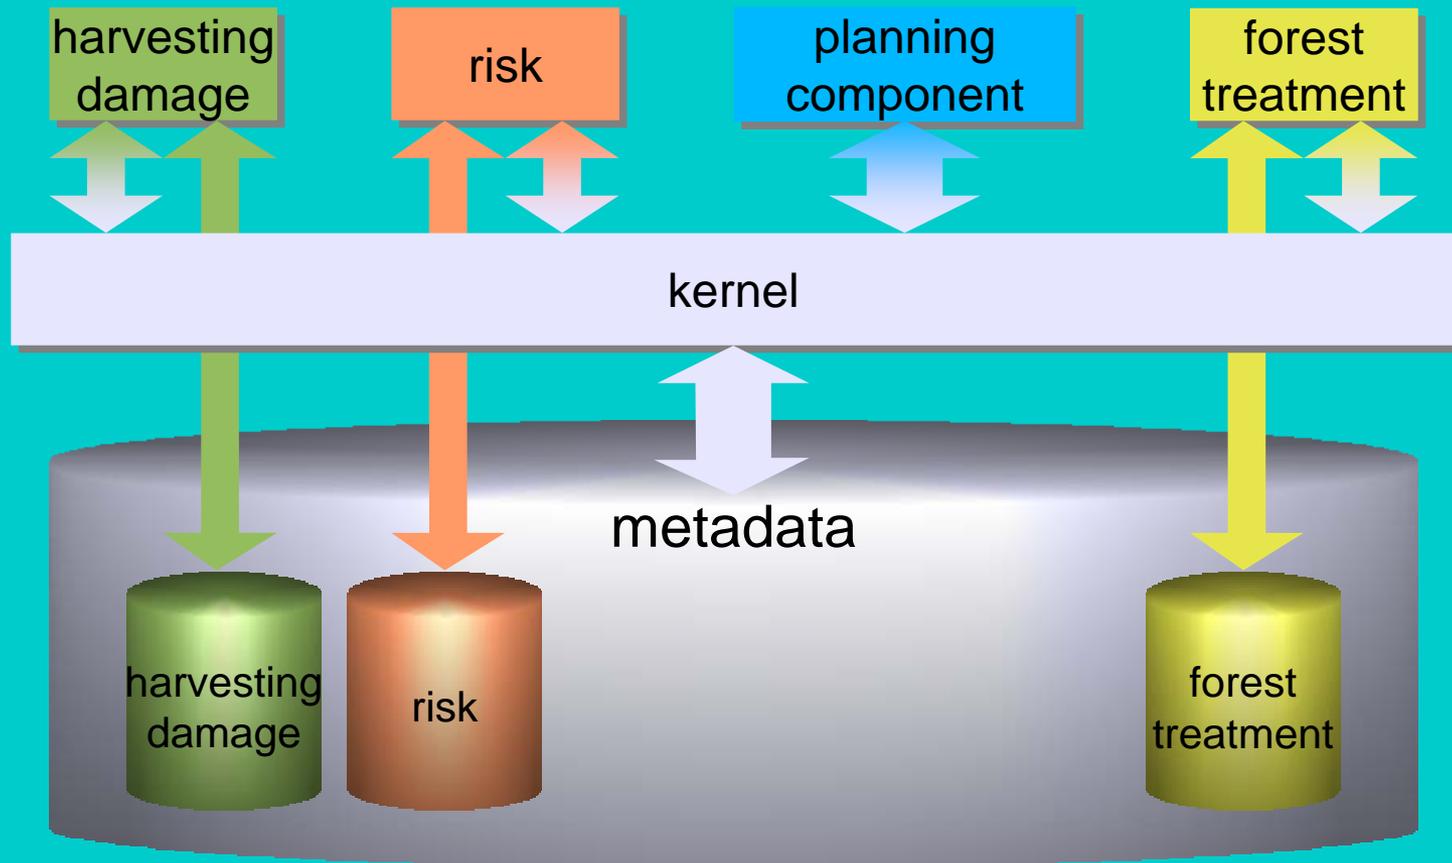

MiddleWare

- ◆ Java field
 - (Enterprise) JavaBeans
 - Proprietary solutions
- ◆ Common Object Request Broker Architecture (CORBA)
- ◆ (D)COM, ActiveX, .Net

Infrastructure

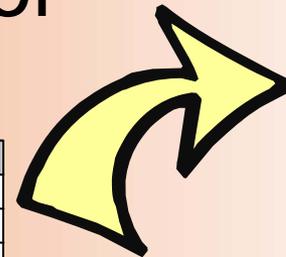

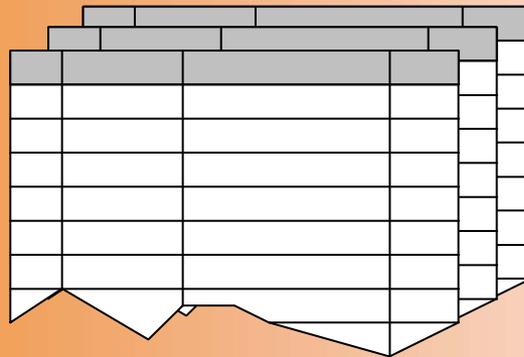

Decision support system

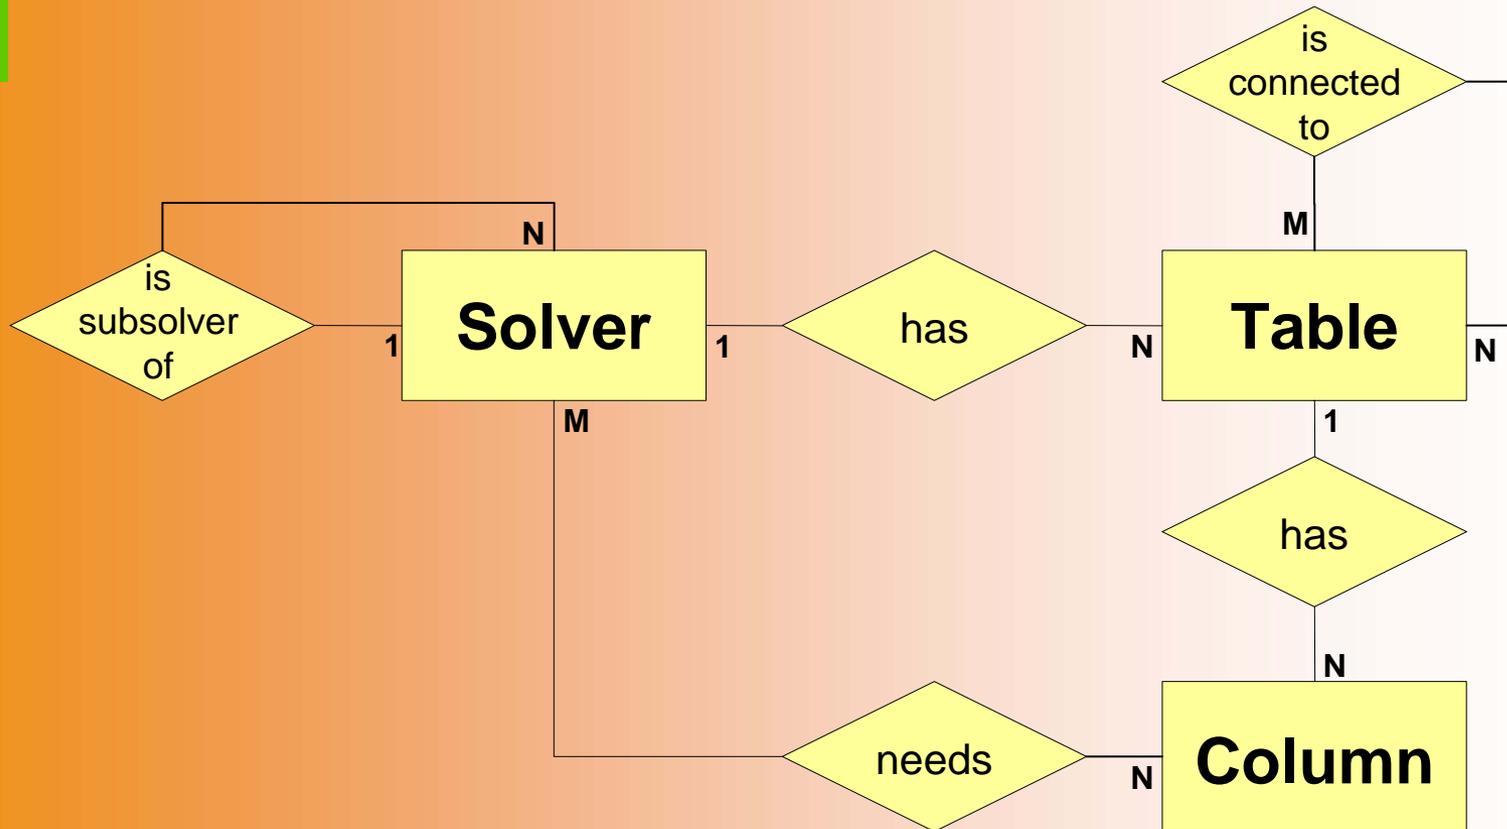

- 
- ◆ Introduction
 - ◆ **Metadata concept**
 - ◆ Metadata details
 - ◆ Conclusion

Metadata concept

- ◆ Extensible abstract data model
- ◆ Logical view on top of tables and columns

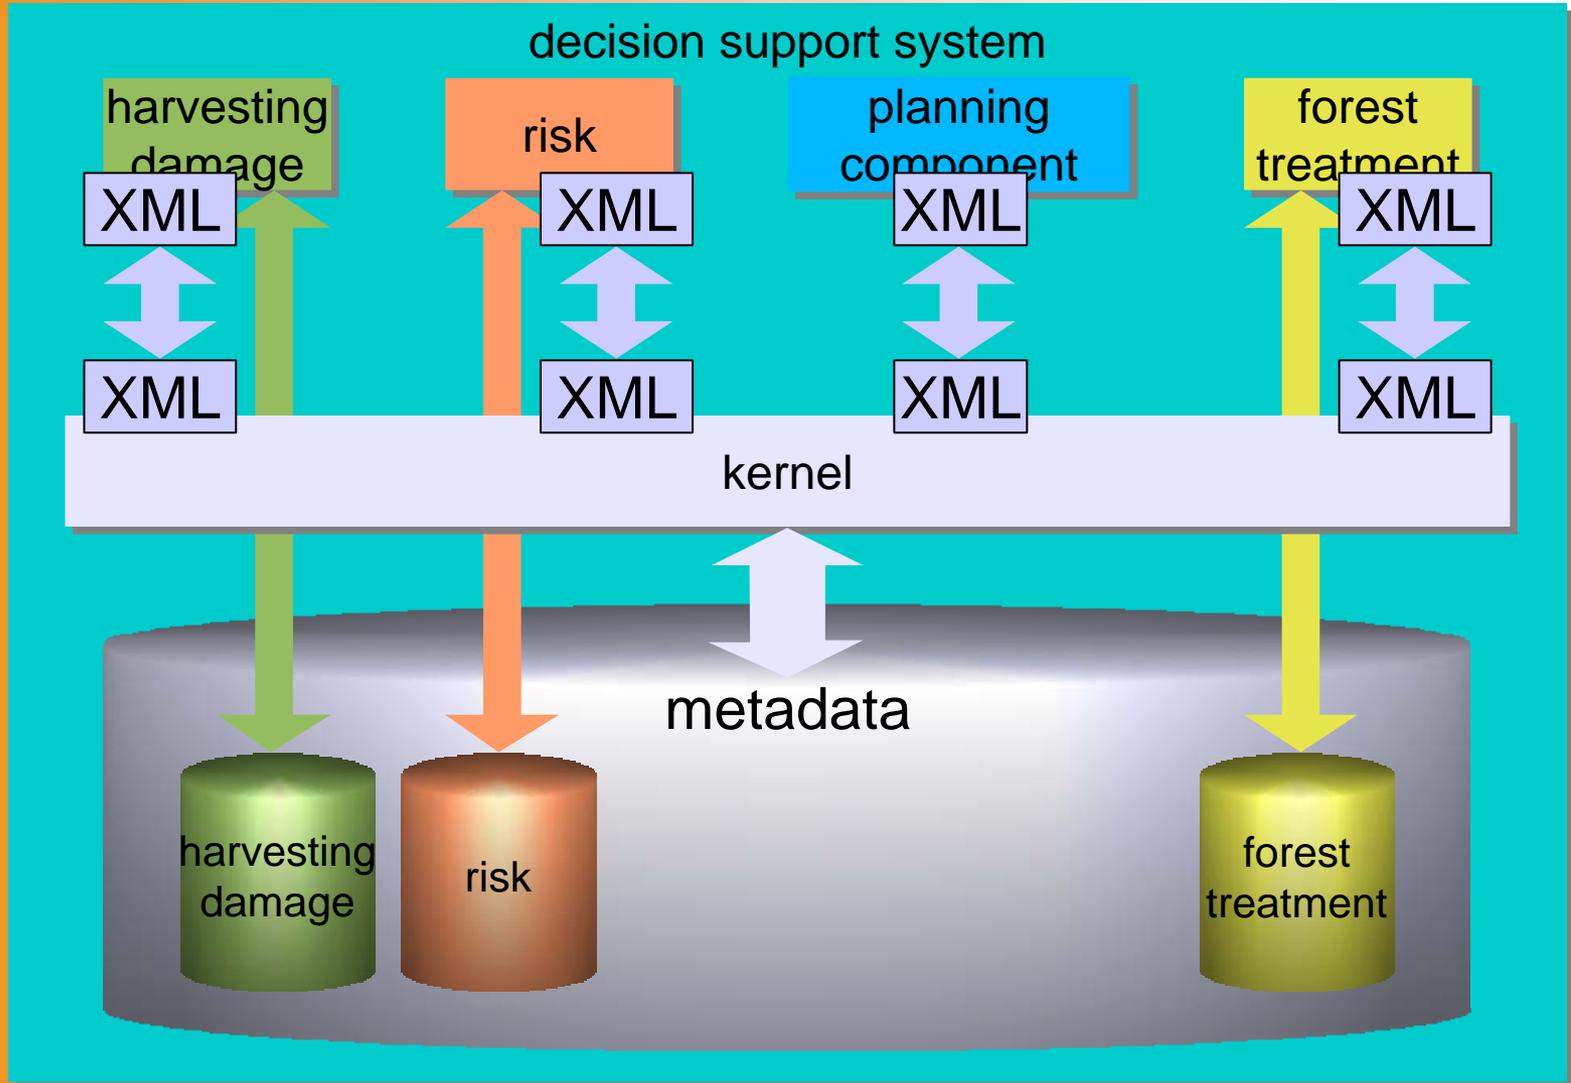

Metadata organisation

Metadata services

- ◆ solver registration
- ◆ data presentation
- ◆ result presentation
- ◆ solver start sequence

Metadata transfer

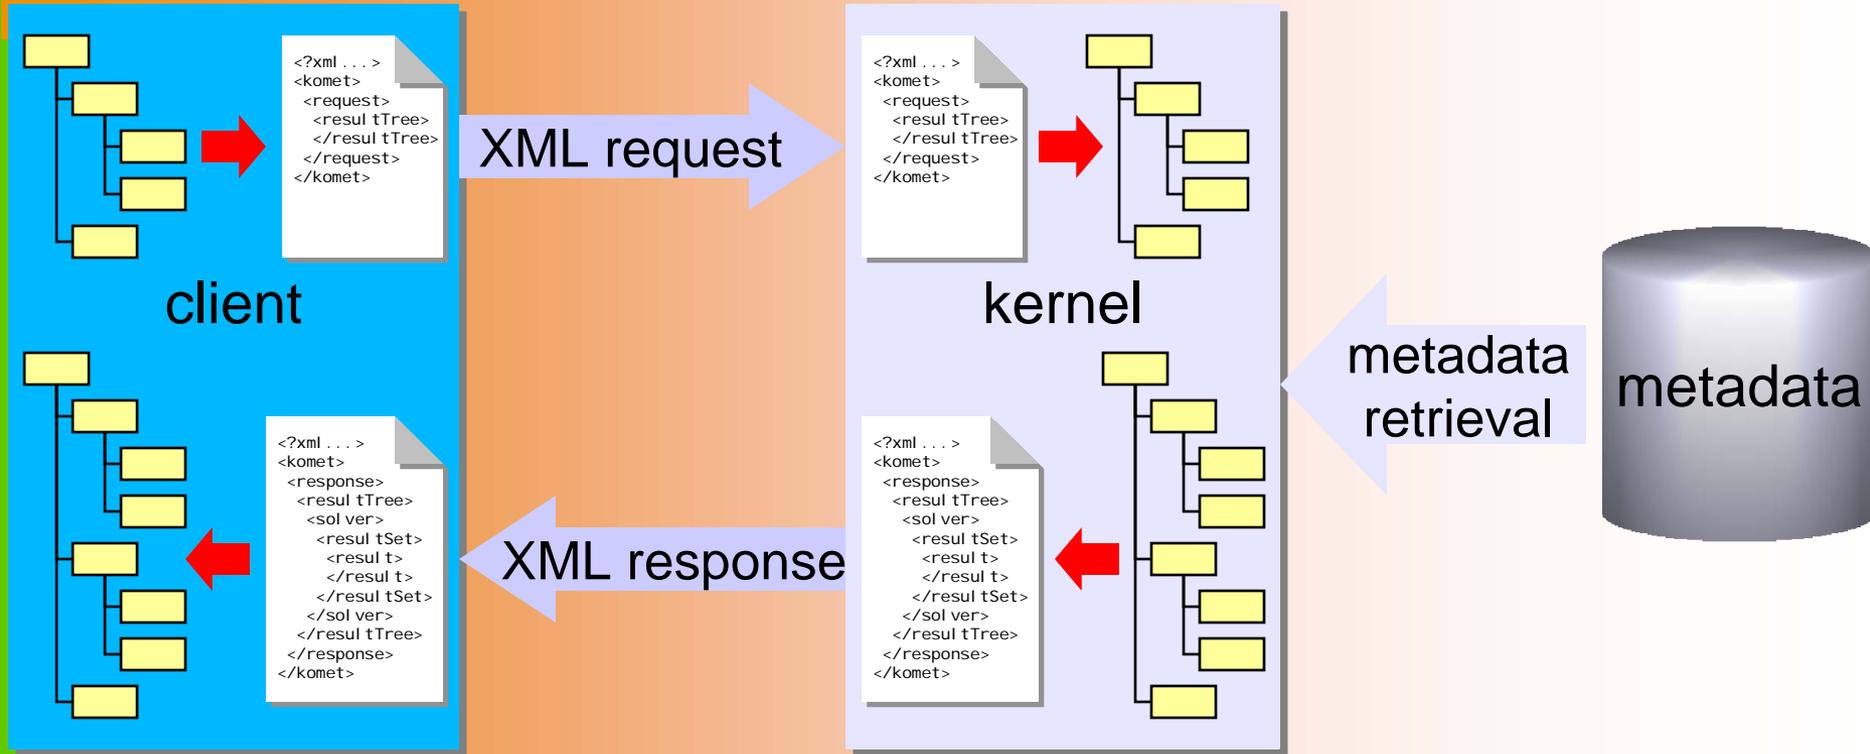

Advantages of XML

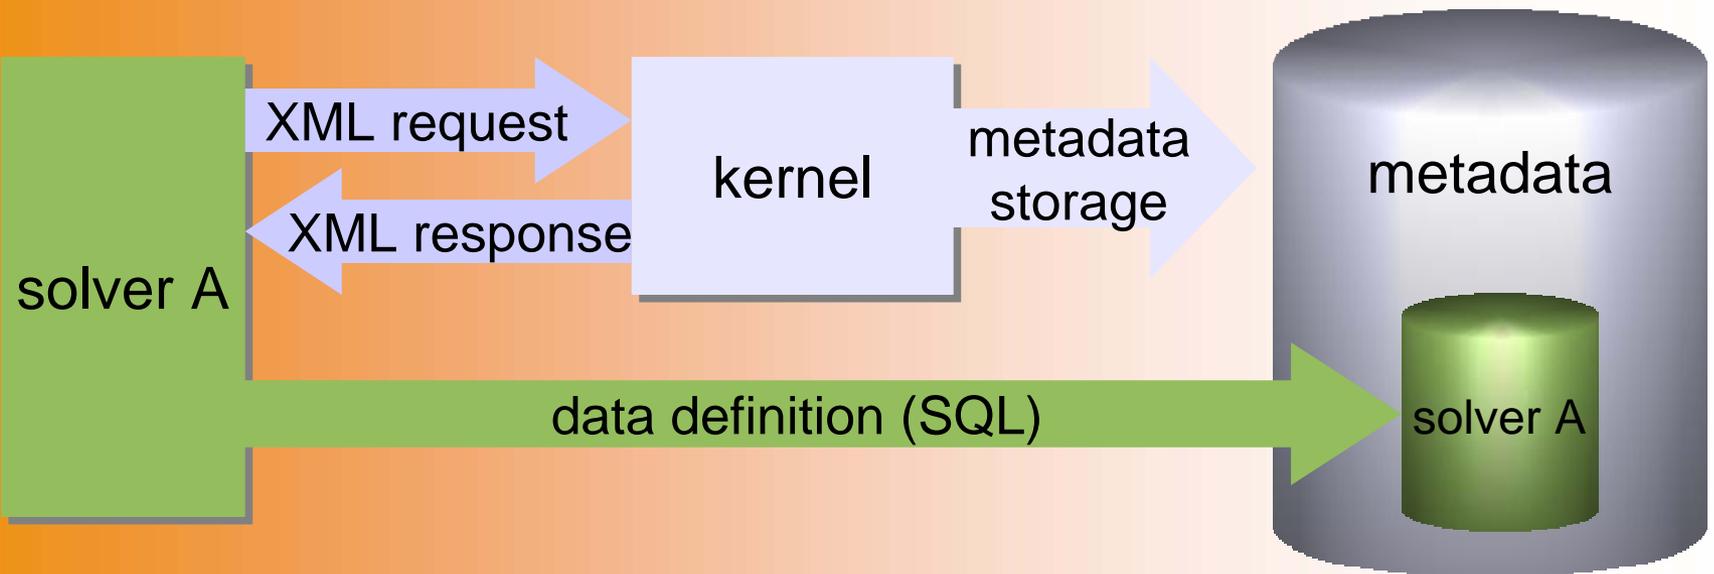

- ◆ Transportation of plain character strings
- ◆ Programming language independence

- 
- ◆ Introduction
 - ◆ Metadata concept
 - ◆ **Metadata details**
 - ◆ Conclusion

Metadata retrieval process

Solver installation process

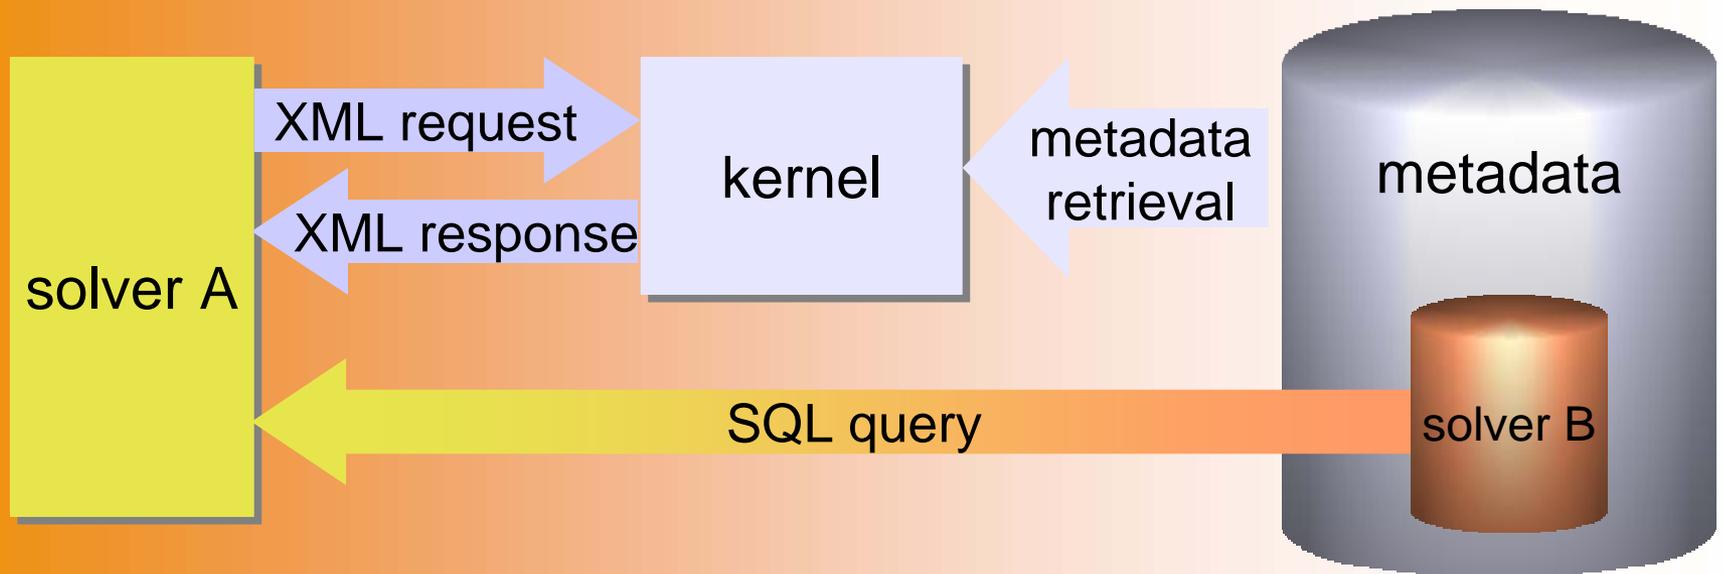

```

<?xml version='1.0' encoding='utf-8'?>
<!DOCTYPE komet SYSTEM 'komet.dtd'>
<komet>
  <request>
    <register>
      <regSolver id='SILVA' name='growth model Silva 2.2'>
        <regSubSolver id='SILVA.sort' name='assortment' solverID='SILVA'>
          <regResultSet id='SILVA.SORT.best' name="stand" solverID='SILVA.sort'>
            <regResult id='SILVA.SORT.BEST.bkz' name="stand_key"
              resultSetID='SILVA.SORT.best' key='true' />
            <regResult id='SILVA.SORT.BEST.so' name='sort' resultSetID='SILVA.SORT.best'

```

Used technologies

- ◆ Programming language: JAVA
- ◆ Communication: RMI over IIOP
- ◆ XML processing: SAX

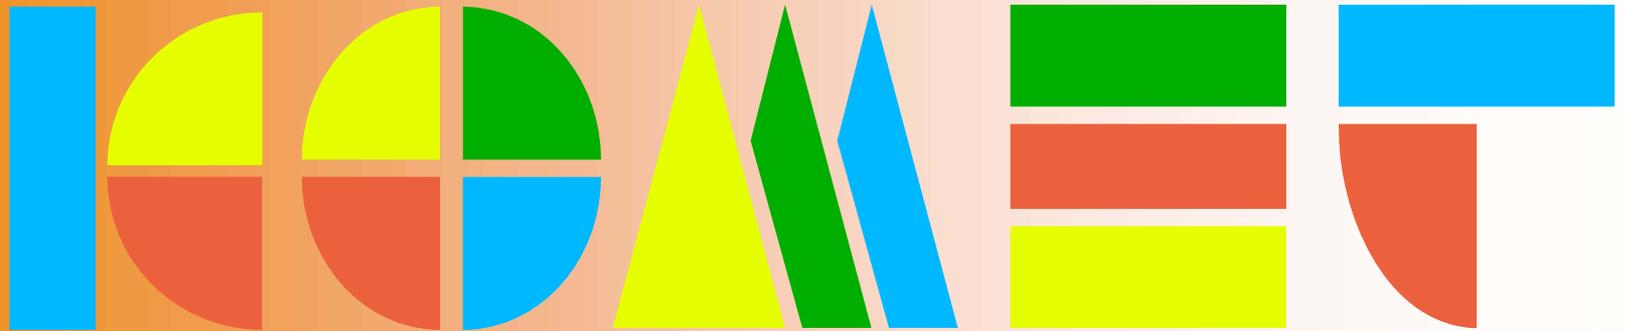

- ◆ Introduction
- ◆ Metadata concept
- ◆ Metadata details
- ◆ **Conclusion**

Integration platform

- ◆ Flexible software architecture with client/server capabilities
- ◆ Uniform data management
- ◆ Parallel computing is possible
- ◆ Components that conform to the specifications can be interchanged

Thank you...

...for your attention!
